

What the Commission’s Conditions Actually Say: a census of condition text, and the object it describes

Dan Post

September 2026

Abstract

The conditions memo established that the Commission’s conditions of approval live in its motions, not in its minutes, and probed 20 cases a year for them against one URL pattern per host. This memo replaces that sample with a census — every case and every motion number the item table records, probed against every place the department has published a motion — and then reads what the conditions say, before any coding scheme is imposed on them.

Condition text reaches back further than the conditions memo said, but not far. The probe answered 127,920 candidate URLs and found 10,165 documents. Parsed condition text now exists for 1,950 of the 4,048 items the item table flags as conditioned (48.2%); the earliest of those items was heard in 1999, and the oldest motion read dates from 1984. The conditions memo put the boundary at 2010; the sources that reach before it are the old site’s document modules and FTP tree, the pre-2003 city pages kept by the Wayback Machine, and adopted motions attached to later packets. They reach 2.4% of conditioned items heard in 1998–2002 and 7.5% in 2003–2009, against 78.9% in 2011–2014. The pre-2010 residual is overwhelmingly items for which no document was found at any address: 1,587 of 1,601.

The conditions are a template with a thin project-specific layer. 1,212 distinct condition headings occur across the motions read; the 40 most frequent carry 76.9% of all headed conditions, and 516 occur in one motion only. What varies from project to project is numbers — hours, feet, periods, unit counts — and a short tail of conditions written for the site.

The entitlement’s maturity is written into the template. The validity condition states a period on 98% of the motions that carry one, and on 96% of those the period is 36 months. The extension condition states a period on only 30 of the 3,366 motions that carry one: it extends the clock by the length of a delay caused by an agency, an appeal or a lawsuit.

1 Coverage: a census, replacing the conditions memo’s sample

The universe. A case is a distinct case number after upper-casing, stripping white space and expanding a two-digit year against the hearing year; the function that says so (`case_universe` in `acquire_external_data.py`) is the one every memo now imports. The item table holds 8,958 such cases. The corpus and conditions memos counted 8,987, because they counted printed strings, and 29 cases were printed both ways — `99.530C` at one hearing and `1999.530C` at another. The census probes the 8,958, and every case count below is on that basis.

1.1 What was searched

The conditions memo’s Table 4 asked whether a packet existed for 20 sampled cases a year at two constructed addresses (578 cases, 225 packets found). Four things found while building the census changed the search, and each became a stage of it.

- **No directory lists its contents.** 0 of the 10 directory and bucket-listing URLs tried returned an index, so every document has to be asked for by name.
- **The minutes link their own documents.** The HTML minutes hyperlink motions and packets on the old `sf-planning.org` tree (the links run from 2000 to 2017), and from 2017 the PDF minutes link every motion, resolution and DRA number to the adopted document in the department’s vault. Reading the raw corpus locally gave 12,917 links from 650 minutes documents. Many of the archived HTML pages disable their links by renaming the attribute to `data-href`; reading `href` alone had silently dropped every one.
- **The archived agendas link the packets.** A crawl of 247 archived agenda pages of the old site found 2,127 document links, and the 2015–2026 hearing pages (315 of them) 4,007 more.
- **The Wayback Machine holds the pre-2003 city site.** The CDX index returned 92,055 URLs captured with status 200 under the 11 prefixes searched (Table 2). Almost all are agendas, notices and reports. The ones named by motion or case are few: 20 HTML motion pages from the pre-2003 city site, 136 motion PDFs and 2,963 packets, the motion captures from 2002 and the packets from 2011. That is the Wayback yield, reported by year as the brief asks, and it is small.

Together the four sources gave 11,527 distinct URLs, 8,932 of them about a case or a motion. The probe then asked for every case in the universe under every case-keyed family — as printed, as its stem, and as the stem with each suffix the minutes attach to it — and for every motion and resolution number under the motion families, in the hearing year and the years either side. Table 1 lists the families. It used `HEAD`, falling back to a ranged `GET` where `HEAD` was refused, at no more than 2 requests a second per host. It answered 127,920 URLs: 10,165 documents, 117,472 absent, 275 behind the vault’s sign-in page or its “not public” error page, 8 redirected by a dead host to its new home page (counted as absent, not as documents), and 0 other. The probe finished.

Table 1: The URL families probed. ‘Constructed’ families were probed for every case or motion number the item table records; the others are exact URLs found in the minutes’ own hyperlinks, on the hearing pages, on the archived agenda pages or in the Wayback Machine’s index. Column labels are the ones Table 4 uses.

Label	Holds	Where
A-yr	adopted	<code>commissions.sfplanning.org/cpcmotions/<year>/<motion>.pdf</code>
A-yr-m	adopted	the same keys on the S3 mirror, <code>default.sfplanning.org/meetingarchive/planning_dept/commissions.sfplanning.org/cpcmotions/...</code>
A-ftp	adopted	the old site’s FTP tree on the mirror, <code>.../sf-planning.org/ftp/files/Commission/cpcmotions/<motion>.pdf</code>
A-mod	adopted	the old site’s document modules, <code>.../sf-planning.org/modules/<motion>-documentid=<n>.pdf</code> , linked from the archived agenda and minutes pages
A-html	adopted	the pre-2003 city site’s HTML motion pages, <code>ci.sf.ca.us/planning/f_motion/<motion>.htm</code> ; Wayback captures only the same, on <code>sfgov.org/planning/cpcmot/</code> ; Wayback captures only
A-vault	adopted	the department’s document vault, <code>citypln-m-extnl.sfgov.org/External/link.ashx?... and SharedLinks.aspx?...</code> , linked from the 2017– minutes
P	draft	<code>commissions.sfplanning.org/cpcpackets/<case>.pdf</code>
P-m	draft	the same keys on the S3 mirror
P-ftp	draft	the old site’s FTP tree, <code>.../ftp/files/Commission/cpcpackets/<case>.pdf</code> , live and in Wayback captures
P-date	draft	<code>citypln-m-extnl.sfgov.org/Commissions/CPC/<M>_<D>_<YYYY>/Commission%20Packet/<case>.pdf</code> , keyed by hearing date
DRA	DR action	<code>commissions.sfplanning.org/cpcdra/</code> , its mirror and the old FTP tree

Table 3 records the searches that came back empty or closed, so that nobody runs them again.

Table 2: The Wayback Machine’s yield: distinct document URLs captured with status 200 under the 11 CDX prefixes, by the year of first capture and by kind. Adopted motions are HTML pages (pre-2003 city site) or PDFs named by motion number; packets are PDFs named by case. Everything else captured under the prefixes — agendas, notices, reports, and the old site’s **ShowDocument** pages, whose URLs name no motion or case — is in ‘other’. A motion or packet capture’s live equivalent is probed; a capture is pulled only where the live copy is gone.

Table 3: Negative results: searches that came back empty or closed, so nobody runs them again.

Search	What was tried	Result
Directory listings	10 directory and S3 bucket-listing URLs on both hosts	0 returned an index; every document has to be asked for by name
Adopted motions by year on <code>commissions.sfplanning.org</code>	19,811 constructed URLs	915 answered; the same keys on the S3 mirror answered 477
Date-keyed packet host before 2022	30,096 constructed URLs for hearings before 2022	0 answered
Vault links as the 2017–2021 minutes print them	the staff form <code>/link.ashx</code>	a sign-in page; the public form <code>/External/link.ashx</code> serves the same object
Vault objects not shared publicly	275 links	the vault’s sign-in or “not public” page; counted as absent, not as documents
The pre-2003 city site’s motion pages	Wayback CDX under <code>ci.sf.ca.us/planning</code> and <code>sfgov.org/planning</code>	20 motion pages captured in all
The city site’s later planning pages	Wayback CDX under <code>sfgov.org/site/planning</code> and <code>sfgov.org/site/uploadedfiles/planning</code>	82,581 captures, 0 named by a motion or case number
Recorded Notices of Special Restrictions	the Assessor-Recorder’s public pages (read, not searched)	an index by APN and document type from 1990; images by purchase; bulk access not addressed (§9)

1.2 The census

Table 4 is the census, by the first hearing year of the case or motion each document belongs to and by URL family; Figure 1 shows what it yielded, year by year — the motions read and the share of the conditioned docket they reach. The census is what the conditions memo’s Table 4 becomes when every case is asked about, and it replaces it. Each family answers for its own span of years: the old site’s document modules and FTP tree for the last years of the HTML minutes, the motion archive for the first PDF years, the vault from the first minutes that link it, the date-keyed packet host for the most recent hearings, and the main packet host across most of the PDF era beside them. A case first heard early can still have a packet if it came back to the Commission later, which is why the packet columns reach back before the host existed. For cases first heard before the old site’s span almost nothing answers at a live address: the pre-2003 motions survive only as Wayback captures and as exhibits to later packets.

1.3 What was read, and the earliest year by source

A document found is not a result; a document read is. Table 5 counts motion sections with at least one parsed condition, one copy of each motion whichever address reached it — the same adopted motion arrives as a standalone file, a mirror copy and an exhibit to a later packet — by source and era. **The answer to the question the census was built for is its last column:** the earliest hearing year for which condition text is retrievable, by source.

- Adopted motions: the old site’s FTP tree from 2009, its document modules from 2007, the

Table 4: The census: URLs answering with a document, by the first hearing year of the case or motion each belongs to and by URL family (Table 1). A document reached at two addresses — a mirror — is counted at each. ‘A’ columns are adopted motions, ‘P’ columns packets (draft motions), ‘DRA’ Discretionary Review Actions, which are counted and not pulled.

Figure 1: Top: the share of items the item table flags as conditioned for which some condition text has now been parsed, by hearing year. Bottom: the motion sections with parsed conditions behind it, adopted and draft, by hearing year.

department’s vault from 2017, and the pre-2003 city pages (through the Wayback Machine) from 2001.

- Draft motions in packets: from 2007.
- Adopted motions embedded in later packets: from 1984. A motion that modifies an earlier approval attaches the original, so an old motion survives inside a new packet. The oldest of these predate the corpus: the earliest motion read for a case in the universe was heard in 1994, years before the case came back to the Commission, and 448 motion sections read belong to no case in the universe at all. Measured on the item table instead, the earliest conditioned item that now has condition text was heard in 1999.

Table 5: Condition text actually read: motions (adopted) and draft motions (in packets) with at least one parsed condition, by source and hearing year. One copy of each motion is counted, whichever source reached it first in the canonical order.

Type	Source	1998–2002	2003–2009	2010	2011–2014	2015–2017	2018–2021	2022–2026	undated	Earliest
adopted	adopted motions, the old site’s FTP tree	0	1	81	0	0	0	0	0	2009

How much of the conditioned docket has text. Table 6 crosses the parsed sections with the item table. 1,950 of the 4,048 conditioned items (48.2%) now have some condition text, draft or adopted — 2.4% of those heard in 1998–2002, 7.5% in 2003–2009, 71.6% in 2010, 78.9% in 2011–2014, 63.8% in 2015–2017, 83.0% in 2018–2021 and 84.0% in 2022–2026.

Table 6: How much of the conditioned docket now has condition text. ‘Conditioned’ is the item table’s `conditions_imposed` flag. An item has condition text when a parsed motion section with at least one condition is keyed to its case, or is the adopted motion whose number the item records.

Hearing years	Conditioned items	With condition text	Share	Motion number, no text
1998–2002	626	15	2.4%	401
2003–2009	1,070	80	7.5%	645
2010	134	96	71.6%	28
2011–2014	679	536	78.9%	127
2015–2017	312	199	63.8%	86
2018–2021	713	592	83.0%	113
2022–2026	514	432	84.0%	78
All	4,048	1,950	48.2%	1,478

The residual, named. Table 7 sorts the 2,098 conditioned items without text by why. For 381 a document keyed to the item was found and read and yielded no conditions — a staff report, a Discretionary Review Action, a motion that attaches none. For 15 a document was found and not read: over the size cap, a failed download, or a DRA, which the census counts and does not pull. For 1,119 the item records a motion number and no document answered at any address; for 583 it records none, so only the case-keyed families could find it. Before 2010 the residual is almost entirely the last two kinds: 1,587 of the 1,601 pre-2010 conditioned items without text had no document at any address. More work on the parser will not move them; a records request might.

Table 7: The residual: conditioned items with no condition text, by why. ‘Found’ means some probed or discovered URL keyed to the item’s case or motion number answered with a document; ‘read’, that the pull opened it. A document found and read that yields no conditions is usually a staff report or a Discretionary Review Action rather than a motion; one found and not read is over the size cap, failed, or a DRA, which is not pulled.

Hearing years	No text	Found, read	Found, not read	None found, number	None found, no number
1998–2002	611	5	0	396	210
2003–2009	990	7	2	637	344
2010	38	18	2	10	8
2011–2014	143	124	1	14	4
2015–2017	113	68	0	37	8
2018–2021	121	93	8	15	5
2022–2026	82	66	2	10	4
All	2,098	381	15	1,119	583

Mention rate beside parse rate. A change of format looks like missing data unless the rate at which the documents *mention* the thing is measured beside the rate at which it is *parsed*. Table 8 does that over the 5,826 motion sections read. 4,572 mention an Exhibit A; 4,173 have one located and parsed, and 90 have an “Exhibit A” that is some other attachment — a draft ordinance, a development agreement, the department’s response to a CEQA appeal, a mitigation-monitoring table — which the parser now recognises and declines. The remaining 326 mention an Exhibit A that was neither located nor rejected. Reading a sample of them finds three kinds: sections that mention another document’s Exhibit A in running text (the ordinance, agreement or mitigation program a resolution adopts), files that end before their Exhibit A, and parser misses. The validation below is what measures the last.

1.4 How well the text is read

The parsing rules live in `condition_parser.py`, apart from the orchestration, so they could be hashed and frozen. 20 documents spanning the eras and formats were drawn once, with a fixed seed, stratified on era and container, and including documents with no conditions, so that a detector finding conditions where there are none would show. The rules were frozen (2026-09-11 02:30) *before* any label was written, and the documents were then labelled condition by condition from the source layout, by readers who never saw the parser’s output: 395 conditions, after 1 label was changed on checking the source (a compliance line the source had numbered as if it were a condition; the decision is kept in `gold.adjudications.csv`).

Table 8: Mention rate beside parse rate, over every motion section read (one copy of each). A section that mentions an Exhibit A but has none located is either a motion that attaches no conditions and says so, one whose Exhibit A is another kind of attachment (rejected: a draft resolution, an agreement, a mitigation table), or a parser miss; the last is what the validation measures.

Hearing years	Sections	Mention Exhibit A	Exhibit A rejected	Exhibit A located	≥ 1 condition
1998–2002	36	34	0	31	31
2003–2009	163	114	2	95	95
2010	305	250	6	218	218
2011–2014	1,501	1,141	24	1,045	1,045
2015–2017	604	480	19	433	433
2018–2021	1,684	1,362	27	1,244	1,243
2022–2026	1,466	1,150	10	1,076	1,074
undated	67	41	2	31	31
All	5,826	4,572	90	4,173	4,170

- **Round 1, the rules as first frozen:** the parser’s rows matched the labelled boundaries with a precision of 85.1% and a recall of 76.5%. The misses were systematic, not scattered: numbers printed as separate text objects beside their lines, nested numbering in the 1998–2010 motions (lettered parts holding parenthesised conditions), numbering that restarts or jumps, compliance lines that begin mid-line, and page headers that scanned and HTML copies keep inside the text.
- **Round 2, the rules as used:** each of those was fixed, the rules were frozen again (2026-09-11 03:07), and on the same documents the precision is 97.7% and the recall 98.0%; the heading matches the label on 100.0% of the 239 matched rows that carry one, and in the 2 gold documents with no conditions the parser found 0. **These are in-sample figures:** the rules were revised against these documents, and the numbers say how well they fit them, not how well they generalise.
- **Out of sample:** 30 canonical rows drawn at random, after the second freeze, from 30 documents outside the gold set that were pulled after it — documents no rule was written against — and checked against the source pages. 96.7% start and end where the condition does (96.7% start correctly, 96.7% end correctly), and the heading is right on 96.6% of the 29 that have one. **These are the figures to quote.**

2 Anatomy of one motion

Table 9 walks one conditional-use motion end to end: Motion No. 19048, case 2013.1613C, adopted 2013-12-19, 13 pages ([source](#)). It is chosen by rule rather than by taste — the born-digital adopted conditional-use motion in the modern template with the median number of conditions — so it is the typical case, not the interesting one.

The motion has two halves, and only the second is conditions. The first is the Commission’s reasoning: a title block, a preamble reciting the application and the environmental determination, and findings. Two of the findings carry the discretion. Under Planning Code §303 the Commission finds that the use is necessary or desirable and compatible with the neighbourhood; under §101.1

it finds the project consistent with the priority policies. The decision paragraph then approves the application subject to the conditions attached as Exhibit A and in general conformance with the plans on file stamped Exhibit B, and the Commission secretary certifies the vote.

The second half is Exhibit A. It opens with standing blocks that are not conditions of the project but terms of the approval itself — what is authorised, that the conditions are recorded against the parcel, printed on the plans, severable, and how they may be changed — and then the numbered or named conditions, grouped under section heads. The plans, Exhibit B, are cited and kept on file; they are not bound into the motion. That matters for what follows: the building's shape is fixed by the plans, so a condition that changes it has to be written out, and most do not.

Table 9: The anatomy of one conditional-use motion, Motion No. 19048 (case 2013.1613C, adopted 2013-12-19), page by page. The document is chosen by rule: among the born-digital adopted conditional-use motions on the motion archive written in the modern template, the one whose condition count is closest to their median, ties broken by document identifier.

Part	Pages	What it is
Title block and summary of the request	1	Motion number, hearing date, case number, address, zoning, sponsor, staff contact; then the one-sentence statement of what the motion adopts.
Preamble	1–2	The application, its filing, the environmental determination and the hearing, recited as “whereas” facts.
Findings	2–8	The site, the surroundings, the project, public comment, and Planning Code compliance item by item.
the conditional-use finding (§303)	4	Whether the use is necessary or desirable and compatible with the neighbourhood, and not detrimental — the discretion itself.
the priority policies (§101.1)	7	The priority-policy findings, one paragraph each.
Decision	9	The approval, made subject to the conditions attached as Exhibit A and to the plans on file; the appeal period; and the adoption block with the roll call (p. 9).
Exhibit A: standing blocks	10	Authorization, Recordation of conditions of approval, Printing of conditions of approval on plans, Severability, Changes and modifications.
Exhibit A: Performance	10–11	2 conditions: Validity and Expiration; Extension.
Exhibit A: Design	11	2 conditions: Garbage, composting and recycling storage; Odor Control Unit.
Exhibit A: Monitoring	11–12	2 conditions: Enforcement; Revocation due to Violation of Conditions.
Exhibit A: Operation	12–13	6 conditions: Garbage, Recycling, and Composting Receptacles; Sidewalk Maintenance; Noise Control; Odor Control; Community Liaison; Hours of Operation.
Exhibit B	—	The plans, cited by date in the decision (p. 9); kept on file and not bound into the motion.

3 Every standing section, and the most frequent headings

Table 10 lists the standing blocks and the section heads under which conditions are grouped, each with the number of motion sections carrying it, the share of conditional-use motions that carry it, the median length of a condition’s body under it, and the first and last hearing year it was seen. The 5 preamble blocks and the *Performance* and *Monitoring* sections are on the large majority of conditional-use motions, *Operation* and *Design* on most, and *Parking and Traffic* and *Provisions* on a minority — selected by project. The 1998–2009 motions group their conditions differently — “General Conditions”, or lettered parts such as “The Approved Project” and “Operation” with parenthesised conditions under each — and those appear as their own rows.

Table 10: The standing blocks of Exhibit A. Preamble blocks open it; the sections group the numbered conditions. ‘Motions’ counts motion sections carrying the block; ‘CU share’ is the share of conditional-use motions with conditions that carry it; ‘Chars’ the median length of a condition’s body under it.

Table 11 gives the 40 most frequent condition headings, with the same statistics and three more: the share of the heading’s bodies that are *identical* to its most common body once numbers are masked — the part of the condition that never varies —, the share stating a quantity with a unit, and the commonest quantities stated. Sorted by those statistics, the headings fall into three kinds (a heading can fall in none).

- **A fixed text, with at most a number changing** (template share at least 80%; 25 headings): Enforcement; Revocation due to Violation of Conditions; Conformity with Current Law; Validity; Expiration and Renewal; Diligent Pursuit; Sidewalk Maintenance; Final Materials; Rooftop Mechanical Equipment; Managing Traffic During Construction; Lighting; Garbage, Recycling, and Composting Receptacles; First Source Hiring; Transportation Sustainability Fee; Residential Child Care Impact Fee; Streetscape Plan; Transportation Demand Management (TDM) Program; Noise Control; Anti-Discriminatory Housing; Overhead Wiring; Compatibility with City Emergency Services – WTS; Installation - WTS; Notification prior to Project Implementation Report - WTS; Implementation and Monitoring - WTS; Noise and Heat – WTS. Once the number is masked, most bodies are word for word

the template; what a project changes, where it changes anything, is the figure.

- **A varying text that states a quantity** (template share below 80%, a quantity in at least 75% of bodies; 3): Bicycle Parking; Validity and Expiration; Hours of Operation. The figure is the point, and the sentence around it is rewritten to fit.
- **A recurring heading over a project-written body** (template share below 50%; 5): Signage; Parking Maximum; Additional Project Authorization; Mitigation Measures; Screening - WTS. The name recurs; what it asks for is written for the site.

What varies across projects, then, is hours, days, distances, counts of spaces and units, the period of validity, and the text of a few site-specific conditions; what does not vary is the enforcement and revocation apparatus and the clock. Table 12 quotes up to three bodies for each block and heading — the earliest, a typical one and the one least like the rest — each cut at 80 words, with the page of the source document and a link to it. Identical bodies are not repeated, so a block with one example has only one form.

Table 11: The 40 most frequent condition headings, by the number of motions carrying them. ‘CU’ is the share of conditional-use motions carrying it; ‘chars’ the median body length; ‘template’ the share of its bodies identical to its most common body once numbers are masked — the part that never varies; ‘quantity’ the share stating a number with a unit; ‘what varies’ the commonest stated quantities.

Heading	Motions	CU	Chars	Template	Quantity	Years	What varies

RECORDATION	<i>early, 1994, p. 64, source:</i> Prior to the issuance of the building permit or commencement of use for the Project the Zoning Administrator shall approve and order the recordation of a Notice in the Official Records of the Recorder of the City and County of San Francisco for the subject property. This Notice shall state that the project is subject to the conditions of approval contained herein and reviewed and approved by the Planning Commission on XXXXXX under Motion No XXXXXX. <i>typical, 2014, p. 15, source:</i> Prior to the issuance of the building permit or commencement of use for the Project the Zoning Administrator shall approve and order the recordation of a Notice in the Official Records of the Recorder of the City and County of San Francisco for the subject property. This Notice shall state that the Project is subject to the conditions of approval contained herein and reviewed and approved by the Planning Commission on February 20, 2014 under Motion No. 19091. <i>most unusual, 2021, p. 14, source:</i> The conditions of approval under the 'EXHIBIT A' of this Planning Commission Motion No. XXXXXX shall be reproduced on the Index Sheet of construction plans submitted with the Site or Building Permit Application for the Project. The Index Sheet of the construction plans shall reference to the Conditional Use authorization and any subsequent amendments or modifications.
SEVERABILITY	<i>early, 1994, p. 64, source:</i> The Project shall comply with all applicable City codes and requirements. If any clause, sentence, section or any part of these conditions of approval is for any reason held to be invalid, such invalidity shall not affect or impair other remaining clauses, sentences, or sections of these conditions. This decision conveys no right to construct, or to receive a building permit. "Project Sponsor" shall include any subsequent responsible party. <i>most unusual, 2015, p. 121, source:</i> The Project shall, except as provided in and subject to the applicable provisions of the Development Agreement between 5M Project, LLC and the City and County of San Francisco for the 5M Project (the "DA"), comply with all applicable City codes and requirements. If any clause, sentence, section or any part of these conditions of approval is for any reason held to be invalid, such invalidity shall not affect or impair other remaining clauses, sentences, or sections of these conditions. . . .
PERFORMANCE	<i>early, 1989, p. 31, source:</i> The authorization and right vested by virtue of this action shall be deemed void and cancelled, if within one year of this motion a site permit has not been secured by Project Sponsor and if within eighteen months of this motion, site work has not begun on the Project. <i>typical, 2019, p. 13, source:</i> No application for Building Permit, Site Permit, or other entitlement shall be approved unless it complies with all applicable provisions of City Codes in effect at the time of such approval. <i>most unusual, 2020, p. 43, source:</i> The Project Sponsor must obtain approval of an Ordinance amending the General Plan to amend the Market and Octavia Plan; an Ordinance amending the Planning Code to update the Market and Octavia Area Plan; and an Ordinance amending the Zoning Map to change the height and bulk classifications on the Project site. The Project Sponsor must also obtain Conditional Use Authorization, pursuant to Section 303; an Office Allocation, pursuant to Section 321; and adoption of shadow findings, pursuant to Section . . .

Block or heading	Example
MONITORING	<i>early, 1989, p. 24, source:</i> the Central Permit Bureau shall collect \$5.000 prior to the issuance of the Building Permit in order to compensate the Department for the cost of monitoring compliance with Sections 149, 163, 164, 165 and 321 of the Code. <i>typical, 2021, p. 34, source:</i> Violation of any of the Planning Department conditions of approval contained in this Motion or of any other provisions of Planning Code applicable to this Project shall be subject to the enforcement procedures and administrative penalties set forth under Planning Code Section 176 or Section 176.1. The Planning Department may also refer the violation complaints to other city departments and agencies for appropriate enforcement action under their jurisdiction. <i>most unusual, 2016, p. 40, source:</i> Per Planning Code Section 415, the Project is required to provide information to the Mayor's Office of Housing (MOH) as follows: The Mayor's Office of Housing (MOH) is authorized to monitor this program. MOH shall develop a monitoring form and annual monitoring fee to be paid by the owner of the real property or the Post-Secondary Educational Institution or Religious Institutions, as defined in Section 102 of this Code. The owner of the real property and each Post-Secondary Educational . . .
OPERATION	<i>early, 1994, p. 66, source:</i> Garbage, recycling, and compost containers shall be kept within the premises and hidden from public view, and placed outside only when being serviced by the disposal company. Trash shall be contained and disposed of pursuant to garbage and recycling receptacles guidelines set forth by the Department of Public Works. <i>typical, 2021, p. 34, source:</i> The Project Sponsor shall maintain the main entrance to the building and all sidewalks abutting the subject property in a clean and sanitary condition in compliance with the Department of Public Works Streets and Sidewalk Maintenance Standards. <i>most unusual, 2017, p. 26, source:</i> The grocery store shall continue to accept payment through SNAP, WIC, or other comparable programs for the life of the project.
DESIGN	<i>early, 1994, p. 66, source:</i> Space for the collection and storage of garbage, composting, and recycling shall be provided within enclosed areas on the property and clearly labeled and illustrated on the building permit plans. Space for the collection and storage of recyclable and compostable materials that meets the size, location, accessibility and other standards specified by the San Francisco Recycling Program shall be provided at the ground level of the buildings. <i>most unusual, 2018, p. 26, source:</i> The Project Sponsor shall provide atwo-level underground parking garage, not three levels as originally proposed. The Project Sponsor shall work with Planning Department on the final design for the garage.
PARKING AND TRAFFIC	<i>early, 2003, p. 65, source:</i> The proposal includes 33 off-street parking spaces, including 1 handicapped space. 27 parking spaces are required by the Planning Code. Of the 6 parking spaces exceeding the minimum requirement, a minimum of 2 shall be made available for the

Block or heading	Example
PROVISIONS	<i>typical, 2021, p. 28, source</i>: The Project Sponsor and construction contractor(s) shall coordinate with the Traffic Engineering and Transit Divisions of the San Francisco Municipal Transportation Agency (SFMTA), the Police Department, the Fire Department, the Planning Department, and other construction contractor(s) for any concurrent nearby Projects to manage traffic congestion and pedestrian circulation effects during construction of the Project. <i>most unusual, 2010, p. 36, source</i>: If the Project includes a retail use larger than 20,000 square feet, including but not limited to grocery, hardware, furniture, consumer electronics, greenhouse or nursery, and appliance stores, which sell merchandise that is bulky or difficult to carry by hand or by public transit, then the Project shall offer, at minimal or no charge to its customers, door-to-door delivery service and/or shuttle service, to meet the requirements of Section 151.1(f) of the Code. <i>early, 2011, p. 27, source</i>: The Project shall adhere to the requirements of the First Source Hiring Construction and Employment Program approved by the First Source Hiring Administrator, pursuant to Section 83.4(m) of the Administrative Code. The Project Sponsor shall comply with the requirements of this Program regarding construction work and on-going employment required for the Project. <i>typical, 2021, p. 28, source</i>: The Project is subject to the Residential Child Care Fee, as applicable, pursuant to Planning Code Section 414A. <i>most unusual, 2013, p. 34, source</i>: Pursuant to Section 424.8, the Project Sponsor is required to participate in a Transit Center District Mello Roos Community Facilities District (CFD) and to include the area of the increment of additional gross floor area beyond the gross floor area approved for the Previous Project in the CFD prior to issuance of the First Temporary Certificate of Occupancy for the Project. The Project Sponsor must demonstrate compliance with this requirement prior to approval of the site permit by the Planning ...
AFFORDABLE HOUSING	<i>early, 2003, p. 63, source</i>: Under Section 315 of the Planning Code, the project is subject to the Inclusionary Housing requirement. The number of below-market-rate (BMR) units required depends upon whether the affordable units are being provided on-site, off-site, or through payment of in lieu fees or the project applicant may choose a combination of two or three of the options. The project applicant shall make a final determination prior to issuance of the site/building permit for the approved project. A. If this requirement is ... <i>typical, 2021, p. 30, source</i>: Under Planning Code Section 415.8, all units constructed pursuant to Section 415.6, must remain affordable to qualifying households for the life of the project. <i>most unusual, 2011, p. 26, source</i>: If the Project becomes ineligible at any time for the On-site Affordable Housing Alternative, the Project Sponsor or its successor shall pay the Affordable Housing Fee prior to issuance of the first construction permit or may seek a fee deferral as permitted under Ordinances 0107-10 and 0108-10. If the Project becomes ineligible after issuance of its first construction permit, the Project Sponsor shall notify the Department and MOH and pay interest on the Affordable Housing Fee at a rate equal ...

COMPLIANCE WITH OTHER REQUIREMENTS	<i>most unusual, 2006, p. 89, source</i>: A landscape plan shall be prepared by a licensed architect or landscape architect and submitted to the Planning Department for review and approval prior to the approval of any building permit applications. <i>early, 2001, p. 28, source</i>: This decision conveys no right to construct, or to receive a building permit. The Project Sponsor must obtain a project approval under Section 309, and satisfy all the conditions thereof, including mitigation measures addressing environmental impacts. The conditions set forth below are additional conditions required in connection with the Project. If these conditions overlap with any other requirement imposed on the Project, the more restrictive or protective condition or requirement, as determined by the Zoning Administrator, shall apply. <i>typical, 2010, p. 21, source</i>: This decision conveys no right to construct. The conditions set forth below are additional conditions required in connection with the Project. If these conditions overlap with any other requirement imposed on the Project, the more restrictive or protective condition or requirement, as determined by the Zoning Administrator, shall apply. The conditions set forth below shall remain in effect for the life of the Project, unless specifically noted otherwise.
SEVERABILITY	<i>most unusual, 2010, p. 27, source</i>: The approved density of 28 affordable dwelling units is contingent on the Board of Supervisors enacting the ordinance to rezone the Subject Property from P (Public) to RH-1 (Residential House: One-Family). If the Map Amendment is not approved, the Project will not be permitted on the Property. <i>early, 2011, p. 15, source</i>: The Project shall comply with all applicable City codes and requirements. If any clause, sentence, section or any part of these conditions of approval is for any reason held to be invalid, such invalidity shall not affect or impair other remaining clauses, sentences, or sections of these conditions. This decision conveys no right to construct, or to receive a building permit. "Project Sponsor" shall include any subsequent responsible party.
STUDENT ENROLLMENT	<i>early, 2014, p. 22, source</i>: Enrollment for the Presidio Hill School shall be limited to 240 students when the 233 Maple Street building is ready for student occupancy. <i>typical, 2020, p. 21, source</i>: Enrollment for the Project shall be up to a total of 250 students.
APPROVED USE CONDITIONS	<i>early, 2009, p. 59, source</i>: This Conditional Use approval is to convert vacant commercial space with approximately 1,000 square feet of floor area for occupancy by a massage establishment (dba Perfect Health Center) on the ground floor of an existing three-story commercial and residential building, within the NC-3 (Moderate-Scale) Neighborhood Commercial District and a 40-X Height and Bulk District, in general conformity with Plans on file with the Department in the docket for Case No. 2009.0580C (labeled EXHIBIT B), reviewed and approved by the Commission ... <i>typical, 2010, p. 11, source</i>: The property owner shall maintain the main entrance to the building and all sidewalks abutting the Subject Property in a clean condition. Such maintenance shall include, at a minimum, daily litter pickup and disposal, and washing or steam cleaning or the main entrance and abutting sidewalks at least once each week.

Block or heading	Example
OPEN SPACE	<i>most unusual, 2010, p. 14, source</i>: The proposal is to convert a vacant retail sales establishment (previously occupied by “Aveda”) to another retail sales establishment (dba BoConcept, a contemporary design furniture and accessories store). The proposed retail store, with approximately 2,300 square feet in floor area, is considered a Formula Retail Use under Section 703.3 of the Planning Code. The proposal will involve interior and exterior tenant improvements to the existing commercial space. There will be no expansion of the existing building envelope. <i>early, 1989, p. 24, source</i>: The Project Sponsor shall place an informational plaque for Project open space conforming to the requirements of Planning Code Section 138(i) . B. Public Artwork; Recognition of Architect and Artists <i>typical, 2001, p. 27, source</i>: The Project shall include the open space described generally in this Motion.
STANDARD CONDITIONS	<i>most unusual, 2001, p. 8, source</i>: Public Artwork; Recognition of Architect and Artists (1) The Project Sponsor shall install one or more works of art on each Area in the Project with a value equal to 1% of the hard construction costs of the building on each development site as determined by the Director of the Department of Building Inspection. The Certificate of Occupancy on each site is contingent on the installation of art on that Area only. If the Zoning Administrator concludes that it is . . . <i>early, 2009, p. 60, source</i>: This Conditional Use approval is valid for three years from the effective date of Motion No. 17955 authorizing the proposed massage establishment use and shall automatically expire on September 24, 2012. This authorization is just an approval of the proposed use and is NOT a permit to implement the approved use. This authorization and right vested by virtue of this action shall be deemed void and cancelled if a Building Permit from the Department of Building Inspection to implement the . . . <i>typical, 2010, p. 12, source</i>: Minor changes to the approved plans may be approved administratively by the Zoning Administrator. Major changes and modifications of conditions shall be subject to review and approval by the Planning Commission requiring a new Conditional Use approval or amendment to this Conditional Use approval as determined by the Zoning Administrator. Such changes must be requested prior to the expiration of this Conditional Use approval.
TRANSPORTATION	<i>most unusual, 2010, p. 21, source</i>: COMPLETION OF BUILDING PERMIT The completion of Building Permit with a final inspection and/or issuance of a Certificate of Final Completion and Certificate of Occupancy from the Department of Building Inspection for the comply with all approved use under this project shall be deemed acceptance and agreement to fully of the conditions of approval of this Conditional Use approval. The project sponsor or the responsible party must ensure that the Building Permit Application has attained a 'complete' stage within the . . . <i>early, 1989, p. 25, source</i>: The Project Sponsor shall execute a Memorandum of Agreement for Transportation Management with the Department, for the provision of a Transportation Management program in compliance with the then currently adopted guidelines for Section 163. <i>typical, 2010, p. 18, source</i>: The Project Sponsor shall maintain an on-site parking area, which through the use of a parking attendant during funeral and memorial services can accommodate approximately 43 vehicles.

Block or heading	Example
CANNABIS RETAIL	<i>most unusual, 1989, p. 29, source</i>: Parking operations shall provide for a minimum of 15 short term spaces for exclusive use by business visitors and clients. All parking included in this minimum allocation is subject to the rate structure set forth in Section 155(g). Leasing, assignment, prepayment, designation for use by any individual or firm, or any other encumbrance of short-term parking spaces shall be prohibited. Parking operations shall also provide for a minimum of 10 spaces designated for Project employee preferential rideshare parking, and shall ... <i>early, 2021, p. 17, source</i>: On-site consumption of packaged or prepared cannabis products is permitted as an accessory use to this Cannabis Retail use. On-site smoking or vaporizing of cannabis products is not permitted. <i>typical, 2022, p. 21, source</i>: The checking of identification cards to verify that patrons of the Cannabis Retail establishment meet minimum age requirements shall occur within the licensed premises if possible. <i>most unusual, 2022, p. 21, source</i>: The Project Sponsor shall obtain operating licenses from the City's Office of Cannabis and the State of California prior to commencing any cannabis sales or other cannabis related activities per Planning Code Section 202.2(a)(5).
CONDITIONS TO BE MET PRIOR TO ISSUANCE OF ANY CERTIFICATES OF OCCUPANCY FOR THE PROJECT	<i>early, 2009, p. 21, source</i>: All usable open spaces shall be completed and available for use.
CONDITIONS TO BE MET PRIOR TO THE ISSUANCE OF A BUILDING OR SITE PERMIT	<i>typical, 2010, p. 38, source</i>: An evacuation and emergency response plan shall be developed by the Project Sponsor or building management staff, in consultation with the Mayors Office of Emergency Services, to ensure coordination between the Citys emergency planning activities and the Projects plan and to provide for building occupants in the event of an emergency. The Projects plan shall be reviewed by the Office of Emergency Services and implemented by the building management insofar as feasible before issuance of the final certificate of occupancy ... <i>early, 2008, p. 20, source</i>: The Project Sponsor and the Project architects shall continue to work on aspects of design development with the Department.
LIGHTING	<i>most unusual, 2010, p. 25, source</i>: A final pedestrian streetscape improvement plan including landscaping and paving materials and patterns, shall be submitted for review by, and shall be satisfactory to the Director of the Department, in consultation with staff from the Department of Public Works and the Department of Parking and Traffic. Other agencies shall be contacted as appropriate. The Project shall include pedestrian streetscape improvements as described in this Motion and in conformance with Planning Code Section 138.1, Section 143, and the Downtown Streetscape Plan. <i>early, 2006, p. 89, source</i>: All Project lighting shall be directed onto the Project Site and immediately surrounding sidewalk area only.

Block or heading	Example
PEDESTRIAN STREETSCAPE IMPROVEMENTS	<i>typical, 2008, p. 11, source</i>: All Project lighting shall be directed onto the Project Site and immediately surrounding sidewalk area only, and designed and managed so as not to be a nuisance to surrounding residents and businesses. Nighttime lighting shall be the minimum necessary to ensure safety, but shall in no case be directed so as to constitute a nuisance to any surrounding property. <i>early, 2001, p. 26, source</i>: The Project shall include pedestrian streetscape improvements generally as described in this Motion and in conformance with Section 138.1. <i>typical, 2008, p. 21, source</i>: The Project Sponsor shall complete the City's standard pedestrian streetscape improvements as required by the Department of Public Works and shall be responsible for the upkeep and maintenance of such improvements if they exceed City standards. <i>most unusual, 2008, p. 21, source</i>: Street trees shall be installed pursuant to the requirements set forth in Section 143. The species and locations shall be subject to approval by the Department of Public Works.
THE APPROVED PROJECT	<i>early, 2006, p. 86, source</i>: This approval is for a Conditional Use authorization to allow a Planned Unit Development pursuant to Sections 712, 271, 303 and 304 for the construction of a mixed-use Project that would include 120 affordable senior dwelling units, 30 supportive housing units for seniors with special needs, approximately 67 off-Street, below-grade parking spaces, and office, meeting, and senior health services space. The Project approved by this Motion is in general conformity with the plans dated August 1, 2005 on file . . . <i>typical, 2008, p. 10, source</i>: Building area and massing authorized herein is limited to that described on the plans labeled EXHIBIT B. The Applicant shall advise the Planning Department staff of any changes or modifications to the Project, which would result in any deviation from the plans (labeled EXHIBIT B), as approved in this Motion. <i>most unusual, 2008, p. 10, source</i>: This approval is to allow the conversion of vacant commercial space (previously occupied by a travel agency, a business or professional service use) to a dental office (a medical service use) on the second floor of a three-story commercial and residential building, within the Inner Clement Street Neighborhood Commercial Zoning District and a 40-X Height and Bulk District, in general conformity with Plans on file with the Department in the docket for Case No. 2008.0332C (labeled EXHIBIT B), reviewed and . . .
FIRST SOURCE HIRING	<i>early, 2008, p. 14, source</i>: The Project is subject to the requirements of the First Source Hiring Program (Chapter 83 of the Administrative Code) and the Project Sponsor shall comply with the requirements of this program, including having an Occupancy Program approved by the First Source Hiring Administrator prior to the issuance of the first Certificate of Occupancy. <i>typical, 2011, p. 58, source</i>: The Project is subject to the requirements of the First Source Hiring Program as they apply to permits for residential development (Section 83.4(m) of the Administrative Code), and the Project Sponsor shall comply with the requirements of this Program as to all construction work and on-going employment required for the Project. Prior to the issuance of the Site Permit, the Project Sponsor shall have a First Source Hiring Construction and Employment Program approved by the First Source Hiring Administrator, . . .

Wording drift. Table 13 compares, for each frequent heading with enough bodies in two or more eras, the most common body in the first era it appears and in the last, on number-masked text. Of the 40 headings compared, 27 kept the same most common sentence from the first era to the last (a similarity of at least 0.99). 7 were rewritten — a similarity below 0.60 — and they are the rows at the top of the table: Additional Project Authorization; Eastern Neighborhoods Infrastructure Impact Fee; Lighting; Mitigation Measures; Noise; Extension; Hours of Operation. For most of them the lowest similarity between adjacent eras is as low as that between the first era and the last: the sentence was replaced at one step rather than drifting.

Table 13: Wording drift. For each frequent heading with at least five bodies in two or more eras, the similarity (0–1, on number-masked text) of its most common body in the first and last era it appears in, and the lowest similarity between adjacent eras. 1 means the template did not change.

4 The long tail

516 of the 1,212 distinct headings occur in one motion only. Table 14 quotes 20 of those conditions, drawn at random with a fixed seed, with the kind of case each belongs to. These are the conditions a coding scheme will not anticipate, and they are where the Commission’s attention to the particular site shows. A count of them per motion would be a cleaner measure of bespoke conditioning than the total. The draw is from headings seen once, so a condition whose heading is common but whose body is not is not in it; some drawn rows are also parser artefacts (a heading read from the first words of a sentence), which is what a random draw of one-offs is expected to surface.

Table 14: The long tail: 20 conditions whose heading appears in no other motion, drawn at random (seed fixed), with the kind of case they belong to.

Heading	Case type	Body
Final Approval	downtown project	Final approval of a site or building permit for this project by the City shall be contingent on the final approval and adoption of the amendments to the Planning Code, the Zoning Maps Amendments, and other required actions required to finalize the new Rincon Hill Downtown Residential Mixed-use District. <i>(2005, p. 18, source)</i>
Findings pursuant to Article 11	conditional use	The Historical Preservation Commission has determined that the proposed work is compatible with the exterior character-defining features of the subject building and meets the requirements of Article 11 of the Planning Code: That the proposal respects the character-defining features of the subject building; That the architectural character of the subject building will be maintained and those features that affect the building’s overall appearance that are removed or repaired shall be done so in-kind; All architectural elements and ... <i>(2010, p. 39, source)</i>
Downtown Streetscape Plan - C-3 Districts	informational	Pursuant to Planning Code Section 138.1 and the Downtown Streetscape Plan, the Project Sponsor shall submit a pedestrian streetscape improvement plan to the Planning Department for review in consultation with the Department of Public Works and the Department of Parking and Traffic prior to Building Permit issuance. <i>(2012, p. 51, source)</i>
Architectural Character	conditional use	The architectural treatment of the building shall be as described on the plans dated February 22, 2012, and stamped “EXHIBIT B”, consisting of 1) horizontal solid wood cladding on the north, south, and east facades of the 2nd and 3rd floors of the Project, that will weather and vary in color with age; 2) glass and aluminum window assemblies set back from the east facade surface by up to 15” in a semi-regular pattern to provide depth and shadow variation; ... <i>(2013, p. 24, source)</i>

Heading	Case type	Body
Jobs	conditional use	Housing Linkage. Pursuant to Planning Code Section 413 (formerly 313), the Project Sponsor shall contribute to the Jobs-Housing Linkage Program (JHLP). The calculation shall be based on the net addition of gross square feet of each type of space to be constructed as set forth in the permit plans. The Project Sponsor shall provide evidence that this requirement has been satisfied to the Planning Department prior to the issuance of the first site or building permit by the Department of ... (2013, p. 25, source)
Acoustical Consultant	conditional use	An acoustical consultant shall prepare an acoustical report prior to occupancy of the Outdoor Activity Area to document existing conditions prior to occupancy. The consultant shall also monitor the operation and shall report findings after the nine month trial period. (2013, p. 18, source)
Lighting and Security Measures	conditional use	The subject establishment shall enact lighting and safety measures at street level and at the rooftop parking area at late night hours as may reasonably be necessary for the safety of customers. (2014, p. 33, source)
Managing Traffic	conditional use	The Project Sponsor shall continue to work with the Planning Department and San Francisco Municipal Transportation Agency (SFMTA) as part of the Building Permit approval process to further evaluate traffic calming measures to minimize pedestrian and vehicular safety impacts. The Project Sponsor and construction contractor(s) shall also coordinate with the Traffic Engineering and Transit Divisions of the San Francisco Municipal Transportation Agency (SFMTA), the Police Department, the Fire Department, the Planning Department, and other construction contractor(s) for any concurrent nearby ... (2015, p. 22, source)
Vintage Sign	not in the item table	Per Planning Code Section 608.14, a vintage sign is required to be maintained in good condition, repair and working order. (2016, p. 20, source)
Executive Park Transportation Management Plan	conditional use	The Project Sponsor shall submit to the Planning Department an updated Executive Park Management Plan at the time of submittal of the building permit to construct the project and implement the approved use for review and approval by the Planning Department. The updated Executive Park Transportation Management Plan shall include, but is not limited to, measures related to enhanced shuttle service, pedestrian streetscape improvements, unbundled parking, car share parking, bicycle repair station, bicycle fleet, delivery and family supportive amenities and ... (2016, p. 32, source)

Heading	Case type	Body
Transit Center District Mello Roos Community Facilities District	not in the item table	Pursuant to Section 424.8, the Project Sponsor shall participate in the Transit Center District Mello-Roos Community Facility District for the development, as it exceeds an FAR of 9.0 to 1. The fee shall be determined based on drawings submitted with the Building Permit Application. <i>(2017, p. 48, source)</i>
Transportation Improvement Measures	not in the item table	Recommended improvement measures described in the Transportation Improvement Measures attached as “EXHIBIT C” are necessary to aid in further reducing less-than-significant effects of the proposed Project and have been agreed to by the Project Sponsor. Their implementation is a condition of Project approval. <i>(2017, p. 26, source)</i>
Child Care Fee: Residential Projects	conditional use	The Project Sponsor shall comply with Planning Code Section 414A, which stipulates an impact fee that must be paid to support child care services. <i>(2017, p. 28, source)</i>
General Advertising Sign Removal	not in the item table	The Project Sponsor shall remove the existing General Advertisement Sign, as defined by Planning Code Section 602. <i>(2017, p. 21, source)</i>
No Future Roof Deck or Railing	conditional use	The Project Sponsor shall not include any future roof deck or railing atop the fourth floor addition. <i>(2018, p. 13, source)</i>
Rear Decks	conditional use	The Project shall be redesigned to provide three-foot setbacks from the southern property lines to second floor balcony decks on all buildings. <i>(2020, p. 17, source)</i>
Student Housing Project	conditional use	The Project must provide all units as student housing units, as defined by California Government Code 65915 et seq., or all inclusionary housing requirements identified in Motion No. 19818 as recorded in the Notice of Special Restrictions No. 2019K737863 recorded on February 28, 2019 shall apply. <i>(2020, p. 23, source)</i>
Provision of a North Lightwell	conditional use	A lightwell measuring twenty-two feet in length and five feet in depth shall be provided along the north property line to mitigate impacts on the two property line windows. <i>(2024, p. 17, source)</i>
November 6, 2024 620 03rd Street 620 03RD ST Formatted	office allocation	Superscript 1. 12 <i>(2024, p. 91, source)</i>
Rear Yard Landscaping Plan	conditional use	Prior to Planning approval of the building permit application, the Project Sponsor shall work with Planning Staff and submit a landscaping plan to the Planning Department, that will be incorporated as “EXHIBIT C”. <i>(2024, p. 18, source)</i>

5 Counts as a variable

A motion’s condition count is the simplest measure of stringency the census makes available, and nothing in the item table can compute it. Table 15 and Figure 2 give it by hearing year for adopted motions (numbered or named conditions only; the 5 preamble blocks are excluded because every

modern motion has them), beside the share of items the item table flags as conditioned. The median adopted motion carries 14 conditions (mean 15.5). Across the 18 years with at least 10 motions read, the rank correlation between the median count and the conditioning share is -0.26: **the count is not rising with the conditioning share**. Read with the corpus memo's substitution — denial falling, conditioning rising — that says the rise is in how often the Commission conditions, more than in how much each approval carries.

Figure 2: Conditions per adopted motion (median and interquartile band) by hearing year, beside the share of items the item table flags as conditioned.

Table 16 splits the count by the case's request type and by project scale. The count rises with scale: the median motion for a project that adds no units carries 12 conditions, against 26 for the 338 motions in the largest unit band, and the large-project authorisations carry the most of any request type.

Table 15: Conditions per motion (numbered or named conditions only, standing preamble blocks excluded), adopted motions by hearing year (years with at least 10 motions), beside the share of items the item table flags as conditioned.

Year	Motions	Median	p25	p75	Items conditioned
2001	11	11	8	16	21.8%
2008	69	12	10	18	19.6%
2010	104	17	12	21	24.7%
2011	118	12	9	19	26.1%
2012	96	11	8	19	29.2%
2013	150	13	9	19	38.0%
2014	83	12	10	19	35.3%
2016	11	17	8	30	26.9%
2017	20	17	12	26	25.7%
2018	142	16	12	24	28.9%
2019	143	13	10	16	33.2%
2020	99	13	11	22	27.6%
2021	149	15	13	20	35.5%
2022	65	16	11	23	32.5%
2023	164	12	11	16	45.1%
2024	114	10	9	14	34.9%
2025	104	10	9	14	35.8%
2026	15	10	10	14	30.6%

Table 16: Conditions per motion by the case’s request type and by project scale (proposed units from the Planning Projects table, reached through the case stem). Adopted and draft motions pooled; one row per motion section.

By	Group	Motions	Median	Mean
request type	(not in the item table)	453	12	15.0
request type	ceqa environmental	21	22	20.0
request type	conditional use	2,920	13	14.6
request type	conditional use modification	89	12	12.4
request type	downtown project	99	25	25.0
request type	informational	12	26	28.2
request type	large project authorization	177	30	30.4
request type	office allocation	124	10	12.0
request type	other	27	20	17.4
request type	variance	53	13	14.9
proposed units	0	2,408	12	14.1
proposed units	1	157	13	12.9
proposed units	2–9	411	14	14.7
proposed units	10–49	226	23	21.7
proposed units	50+	338	26	24.3
proposed units	unknown	462	13	15.5

6 Draft against adopted

The packet carries the draft motion; the Commission adopts a motion that may differ. Where the census has both for a case — the latest draft heard on or before the adoption, and the adopted motion — Table 17 matches their conditions: by heading where both carry headings, allowing for OCR in the adopted copy, and then what is left by number-masked text (in 72 pairs the drafts carry no headings and text is the only key). The adopted copy is often a signed scan read by OCR, so a condition whose text differs by a misread letter or a touched-up word is *near-identical*, not changed; only a condition less than 90% similar to the draft’s counts as reworded. Of 1,281 pairs, 467 (36%) differ in some condition. Of the 19,749 conditions in the drafts, 17,133 are carried word for word and 1,411 near-identical — 94% in all — 394 are reworded and 811 dropped, and the adopted motions carry 1,148 conditions the drafts did not.

The lower panel crosses any change with the item table’s record of the hearing. The item table records modifications for 224 of the pairs, and in 183 of those the conditions did change; but it records none for 257 pairs whose conditions changed nonetheless. **The draft is a good proxy for most of the adopted text and a poor proxy for the part the Commission touches**, and the **modifications** field under-records that part. Table 18 quotes a random draw of the conditions the adopted motions add — the Commission’s own margin, in its own words.

Table 17: Draft against adopted, for every case with both a draft motion and the adopted motion. Conditions are matched by heading where both carry headings (allowing for OCR in the adopted copy), and what is left by text. ‘Reworded’ is a matched condition whose number-masked text is less than 90% similar to the draft’s; ‘near-identical’ differs by less — OCR, typography, a touched-up word — and is not counted as a change. The lower panel crosses any change (reworded, removed or added) with the item table’s record of the hearing.

Quantity	Value	
Draft–adopted pairs	1,281	
with any change	467 (36%)	
Conditions in the drafts	19,749	
carried word for word	17,133	
carried near-identical	1,411	
reworded	394	
removed	811	
Conditions added from the dais	1,148	
	Any change	No change
Item records modifications	183	41
No modifications recorded	257	755
No item at that hearing	27	18

7 The conditions that set the clock

Four conditions define the entitlement’s maturity in the real-options frame: *Validity* (how long the approval lasts before a permit must issue), *Diligent Pursuit* (that construction, once permitted, continue), *Expiration and Renewal* (what happens when the permit lapses), and *Extension* (when the clock stops). Table 19 classes each condition by its heading — or, in the eras that print none, by the first words of its body — reads the first period its body states, and tabulates the periods by hearing year; Figure 3 shows the validity period year by year.

The result is simple. The validity condition states a period on 98% of the 3,904 motions that carry one, and the period is 36 months on 96% of those; the exceptions are shorter or longer periods set for particular projects. Diligent pursuit and expiration state the same period (Table 19). The extension condition carries no period at all on most motions: of 3,366 carrying one, 30 state a period. The modern text reads “All time limits in the preceding three paragraphs may be extended at the discretion of the Zoning Administrator where implementation of the project is delayed by a public agency, an appeal or a legal challenge and only by the length of time for which such public agency, appeal or challenge has caused delay.” **The option’s term is fixed by template, and its extension is state-contingent:** it lengthens exactly when the approval is litigated or held up by another agency.

Table 19: The conditions that set the entitlement’s clock, and the period each states, by hearing year. A condition is classed by its heading or, in the eras that print none, by the first words of its body; its period is the first the body states, in months. For each kind: the motions carrying it, the modal period, and the share of those stating a period that state the modal one. Years with fewer than 5 such motions are pooled.

Year	Validity			Diligent pursuit			Expiration and renewal			Extension		
	Motions	Modal	At modal	Motions	Modal	At modal	Motions	Modal	At modal	Motions	Modal	At modal
2001	4	18	50%							1	—	—
2007	5	36	80%	1	36	100%	1	36	100%	3	—	—

Figure 3: The period the validity condition gives the sponsor to obtain a permit, by hearing year: the share of motions whose validity condition states fewer than, exactly, or more than the modal 36 months.

8 The conditions memo’s coding scheme on the full set

The conditions memo wrote a 13-category keyword scheme against the headings of the 225 packets its sample found. Table 20 runs it unchanged on the census. By distinct heading it reaches 53.5% of the 1,212 headings; weighted by how often each is imposed, 87.8%. On the eras that print no headings, where the scheme reads the body instead, it reaches 85.4% of bodies — a number that flatters it, because a body has more words for a keyword to hit. Weighted by imposition, 65.5% of headed conditions change the project’s obligations and 16.4% change the project. Table 21 lists the most frequent headings the scheme misses, the first of them First Source Hiring; Streetscape Plan; Anti-Discriminatory Housing; Overhead Wiring; Eating and Drinking Uses; Transformer Vault.

The caveat stands. The keywords were written by reading the conditions memo’s packet headings and revised once against the headings the first draft missed; the coverage figures are in-sample to that extent. They support the claim that a small scheme spans most of what is imposed, not that the scheme is a validated classifier.

Table 20: The conditions memo’s thirteen-category scheme, run unchanged on the census. Headings are scored by distinct heading and weighted by how often each is imposed; the eras that print no headings are scored on the condition’s text instead, which the scheme was not written for. In-sample: the keywords were written against the headings of the first 225 packets, with one round of revision.

Family	Category	Headings, distinct	Headings, weighted	Unheaded bodies
Changes the project	Massing and envelope	4.4%	0.2%	11.1%
	Unit count and mix	1.7%	0.1%	3.5%
	Design and materials	8.7%	9.2%	20.2%
	Use and operations	6.3%	6.9%	19.1%
Changes its obligations	Affordability	4.4%	1.3%	2.6%
	Fees and exactions	6.8%	4.1%	7.1%
	Transport and parking	11.8%	11.6%	17.3%
	Open space and streetscape	5.3%	6.1%	8.9%
	Monitoring and reporting	5.0%	20.7%	22.4%
	Environmental mitigation	2.4%	1.5%	3.0%
	Historic preservation	0.6%	0.0%	2.2%
	Validity and timing	1.2%	21.5%	2.7%
Neither	Procedural and findings	2.4%	6.0%	28.2%
Any category		53.5%	87.8%	85.4%

Table 21: The most frequent headings the scheme does not reach.

Heading	Conditions
First Source Hiring	558
Streetscape Plan	422
Anti-Discriminatory Housing	308
Overhead Wiring	293
Eating and Drinking Uses	280
Transformer Vault	277
Car Share	249
Transformer Vault Location	223
Other Conditions	217
Duration	174
Art	174
Unit Mix	162
Showers and Clothes Lockers	159
Phasing	151
Jobs Housing Linkage	147

9 Recorded Notices of Special Restrictions

Every modern conditional-use motion carries a Recordation block requiring a Notice of Special Restrictions to be recorded against the parcel, stating the conditions; the notices would reach the conditions of cases whose motions are not online. Nothing was searched or downloaded to check this; the Assessor-Recorder’s public pages were read, and the terms below are quoted from them ([SF.gov](#), “[Get copies of recorded documents](#)”; the official-records site’s [disclaimer](#)). The index can be searched “by name, document number, document type, or by using the Assessor’s Parcel Number” and “does not allow searches by property address”; “online official record index information is available from January 1, 1990 forward”, and “documents recorded prior to January 1, 1990 can only be searched in our office”. A search returns an index entry. The image of a document is available to registered users, whose registration asks for identity verification, and is bought per document — online at a per-document price plus a card fee, or in person at a per-page price — at the rates the SF.gov page lists. The disclaimer says nothing about automated or bulk access, and the list of document types is not served to an anonymous session, so whether “Notice of Special Restrictions” is a selectable type could not be confirmed. **An index-only census of notices on the risk set’s parcels is possible in principle from 1990, one parcel at a time; the text costs a purchase per document; the pre-1990 notices are in the office only; and whether bulk index access is permitted is a question for the Recorder, which this job did not ask.**

10 Established, and not established

Established.

1. The case universe is 8,958 cases, defined once; the 8,987 in the earlier memos is printed strings, 29 of them the same case written two ways.
2. No directory lists the documents. The census found them by name: 10,165 documents among

127,920 URLs asked for, from exact links in the minutes, the agenda and hearing pages and the Wayback index, and from every case and motion number the item table records.

3. Condition text exists for 48.2% of conditioned items. It reaches back to items heard in 1999, but before 2010 it is thin, and the pre-2010 residual is documents that were not found anywhere, not documents that were found and misread. The conditions memo's "no amount of work recovers condition content before 2010" was a claim about two URL patterns; the truth is "little", not "none".
4. The conditions are a template: a fixed apparatus of enforcement, revocation and clock, a selected set of operating and design conditions whose text is fixed and whose numbers are the project's, and a thin tail written for the site.
5. The count of conditions per motion is not rising with the conditioning share.
6. The option's term is fixed by template at 36 months, and its extension is contingent on delay by others.
7. The item table's `modifications` field under-records the Commission's changes to the draft conditions.

Not established.

1. The residual. The motions for most pre-2010 conditioned items are not online; whether the department holds them, and in what form, is a question for the department.
2. The recorded notices, which would reach the same cases from the other side; see §9.
3. A validated classifier. The scheme's coverage is in-sample; the next step is a hand-coded set of conditions scored the way every other field is.
4. Whether the long tail predicts outcomes. It is quoted here, not yet coded.

11 Reproducing this

`code/commission_minutes_processing/collect_conditions.py` runs the census in stages, each cached and resumable; the parsing rules are in `condition_parser.py`.

```
python acquire_external_data.py sync      # materialise the Dropbox store
python collect_conditions.py discover     # listings, CDX, hearing and
                                         # agenda pages, minutes' links
python collect_conditions.py probe        # HEAD every candidate
python collect_conditions.py pull --host <host> --loop-minutes 15 \
    --max-mb 60                          # one process per host
python collect_conditions.py reextract --network
                                         # pages read before /Rotate fix
python collect_conditions.py parse        # one row per condition
python collect_conditions.py diff         # draft against adopted
python collect_conditions.py gold         # draw the gold set (once)
python collect_conditions.py freeze --round 1 # hash the rules
python collect_conditions.py score --round 1 # against gold_labels
python collect_conditions.py archive --round 1 # keep round 1
python collect_conditions.py freeze --round 2 # after revising
```

```
python collect_conditions.py score --round 2    # in-sample
python collect_conditions.py sample --round 2   # rows after the
                                                # freeze (once), checked by hand
python collect_conditions.py score --round 2    # ...and out of sample
python collect_conditions.py summary           # task1_summary.md
python collect_conditions.py report            # tables, figures, macros
```

Everything lands in `$MFHR_DATA_ROOT/external/cpc-packets/`: `manifests/` (discovery), `availability_full.csv` (the census), `docs/` (the motion sections kept, with their extracted lines), `pull_log.csv` (per-document wall time), `conditions_long.parquet` (and `.csv`) and `motion_sections.csv` (the parse), `validation/` (the frozen round) and `task1_summary.md`. `report` regenerates `tables/conditions_content_tables.tex`, `tables/conditions_content_macros.tex` and the three figures. No number in this memo is hand-placed.

A Data dictionary for `conditions_long`

One row per condition: per (document, motion section, condition). Rows marked **canonical** are the one copy of each motion section the analysis uses; the rest are the same motion read from a mirror or an exhibit, kept so the choice can be audited.

Table 22: `conditions_long`: every column, with its share of rows populated (non-empty, or true for a flag) over all 91,720 rows, canonical or not.

Column	Filled	Meaning
<code>case_no</code>	100%	The case number the document prints (the running header’s most frequent), normalised; empty where none is printed.
<code>case_key</code>	89%	The case in the reconciled universe the row belongs to (see <code>case_match</code>); empty where it does not resolve to exactly one.
<code>case_stem</code>	100%	<code>case_key</code> (else <code>case_no</code>) with its suffix letters removed, by the shared <code>case_stem</code> .
<code>motion_no</code>	42%	The motion or resolution number from the title line; empty for a draft.
<code>doc_type</code>	100%	<code>adopted_motion</code> or <code>draft_packet</code> (a title reading “Draft Motion” or a placeholder number, with no real number in the title).
<code>doc_url</code>	100%	The first URL the document was read from; the lines cache lists every URL that served the same bytes.
<code>hearing_date</code>	99%	ISO date from the “Hearing Date” line, else the date in a date-keyed URL, else the item table’s date for the motion number.
<code>adoption_date</code>	41%	ISO date from “ADOPTED ... on jdate _i ”; empty for drafts.
<code>section_heading</code>	99%	The standing block the condition sits under (PERFORMANCE, MONITORING, ...; in 1998–2009 the lettered part, e.g. ‘The Approved Project’).
<code>condition_no</code>	71%	The printed number: 7, a letter C, or B(2) for a parenthesised item under lettered part B; empty for a named, unnumbered condition or a standing block.
<code>ordinal</code>	100%	Position of the row within its motion section, from 1.
<code>heading</code>	94%	The condition’s name: its bold lead-in, or a short Title Case run before the first full stop where the document has no fonts; empty where none is printed.

Column	Filled	Meaning
<code>body</code>	100%	The condition's text with the heading, running headers, footers, page numbers and the compliance line removed; lines rejoined, hyphenation undone.
<code>compliance_contact</code>	65%	The "For information about compliance, contact ..." line(s) moved out of the body.
<code>page_start</code>	100%	Page of the source document (1-based, in the original file's numbering) where the condition starts.
<code>page_end</code>	100%	Page where it ends.
<code>n_chars</code>	100%	Length of <code>body</code> .
<code>has_dollar</code>	0%	<code>body</code> contains a dollar figure.
<code>has_percent</code>	2%	<code>body</code> contains a percentage.
<code>has_numeric_quantity</code>	19%	<code>body</code> contains a figure with a unit (units, feet, spaces, hours, days, months, years, a.m./p.m., seats, ...).
<code>code_sections_cited</code>	24%	Planning Code sections cited, as printed, semicolon-separated.
<code>code_sections_norm</code>	24%	The same with the Article 4 recodification applied (§315 → §415 and the other pairs the motions themselves state as "formerly").
<code>parse_method</code>	100%	How the start was found: <code>numbered</code> , <code>numbered+bold</code> , <code>numbered+text</code> , <code>bold_heading</code> , <code>lettered</code> , <code>paren</code> , <code>section_block</code> ; <code>+ocr</code> when the page was OCR'd, <code>+ocrdigit</code> when an OCR-misread number was repaired.
<code>parse_confidence</code>	100%	<code>high</code> , <code>medium</code> or <code>low</code> , by rule: <code>low</code> for an implausible length or an unheaded OCR row outside a numbered list; <code>medium</code> for OCR, implicit blocks, sequence gaps and text-read headings.
<code>part</code>	100%	<code>preamble</code> for the standing blocks before the "Conditions of Approval, Compliance, Monitoring, and Reporting" line; <code>conditions</code> otherwise.
<code>implicit</code>	26%	The row is a standing block with prose and no condition start (AUTHORIZATION, SEVERABILITY).
<code>sequence_gap</code>	0%	The number skips one or two from the expected sequence.
<code>style</code>	100%	The section's numbering style: <code>numbered</code> , <code>bold_heading</code> , <code>paren</code> , <code>lettered</code> , <code>unknown</code> .
<code>container</code>	100%	<code>motion</code> (an adopted-motion file), <code>packet</code> , or <code>html</code> (a pre-2003 motion page).
<code>embedded_in_packet</code>	6%	An adopted motion that is not the file's own: attached to a packet, or to a later motion that modifies it.
<code>instrument</code>	100%	<code>motion</code> or <code>resolution</code> .
<code>case_match</code>	100%	How <code>case_key</code> was reached: <code>exact</code> , <code>serial padded</code> , <code>expanded</code> (two-digit year), <code>stem</code> (the only case with that stem), <code>motion number</code> (the item table's case for the motion), or why not.
<code>canonical</code>	92%	The one copy of this motion section the analysis uses: a standalone file over an embedded copy, a text layer over OCR, then the fuller parse.
<code>doc_id</code>	100%	First 16 hex digits of the document's SHA-256; names its cache files.
<code>section</code>	100%	Index of the motion section within the document, from 0.
